

Hosted Microsoft Exchange vs In-House Solutions

Hosted Microsoft Exchange	In-House IT
Affordable for businesses of all sizes	Created to support enterprise-level organizations, with a price-point for that target market
Deployments take minutes, not weeks or months	Deploying Exchange is challenging. Planning and implementation can require hundreds of hours
Ongoing costs are predefined and easy to budget. Adding and deleting users takes just minutes	The continuing cost of maintenance and management increase the lifetime investment significantly
Always a current version of Exchange and Outlook without hassle	Upgrades are costly and can require as much time as initial installations
Doesn't require any specialized personnel for support. Our help desk is your support team	Technical issues – from support to upgrades – can monopolize IT resources
No hardware or software to own or manage	You own the hardware and software...and all their headaches
Never worry about backing up or restoring Exchange	Backing up Exchange requires additional resources. Restores can be time-consuming and cumbersome
All your email – critical, private, important – is safely stored in our SAS 70, Type II certified data center	Without a highly secure IT storage facility, Exchange is vulnerable to security breaches and attacks
Read your email from any computer connected to the internet	Accessing email from alternate computers requires additional implementation time
Syncing to your BlackBerry requires only a simple add-on feature	Connecting to BlackBerry requires additional licenses and servers
