

ANDROID USERS – MARCH 2015

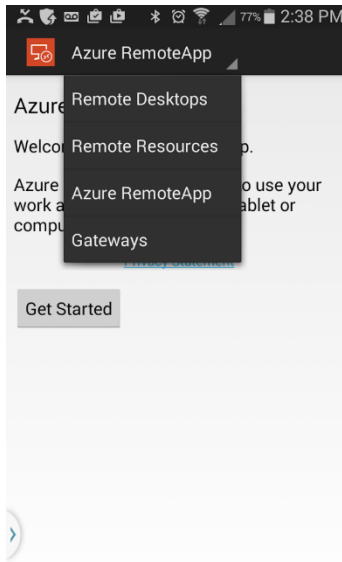

How to Set Up the nWorkspace Client

This guide provides instructions for Android Users installing the Microsoft RDP client. Please note that you do not need to set up the Microsoft RDP client in order to access the nWorkspace via a HTML5 enabled browser – you would simply navigate to login.nworkspace.com.

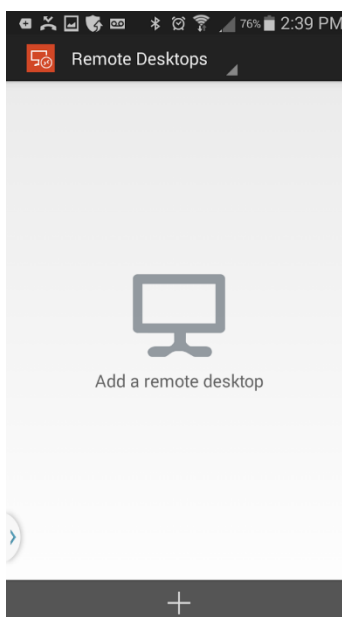

INSTALLING THE RDP CLIENT ON ANDROID DEVICES

The Microsoft RDP client is an easy, one-time install that will allow you to access the nWorkspace via RDP. Follow these simple instructions to download and install the nWorkspace RDP client.

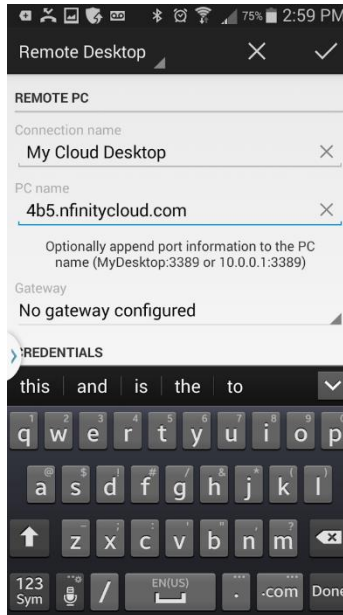

- Open the Google Play store and search for **Microsoft Remote Desktop Client**, then download it
- Open the **Microsoft Remote Desktop Client** and tap **Remote Desktops** to continue

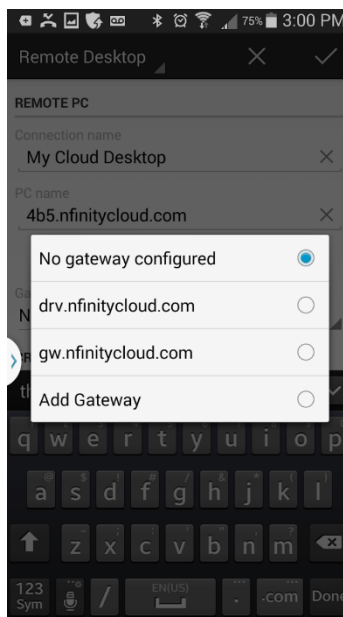

- Tap the + sign to continue

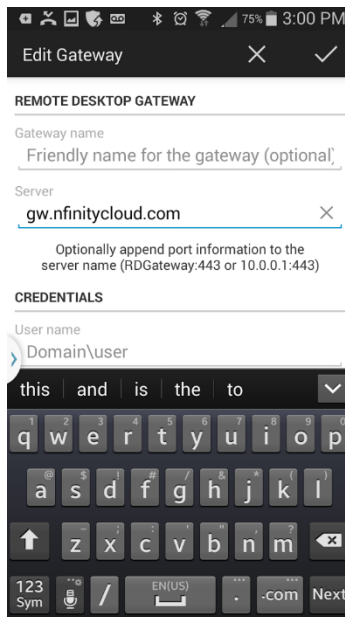

- Enter a name for your Remote Desktop connection (example: My Cloud Desktop)
- Enter the PC Name (aka Server Name) provided by nGenX, then tap **Gateway** to continue

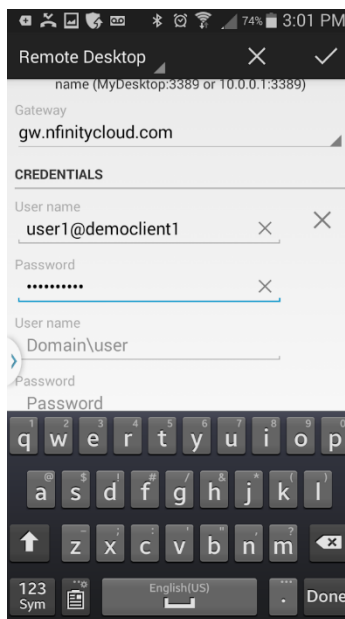

- Select **Add Gateway** to continue

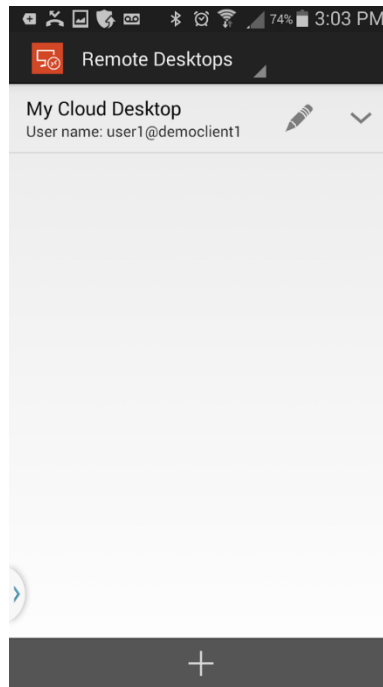

- Enter the Gateway Server name provided by nGenX
 - Name your Gateway if desired, but do not enter credentials here

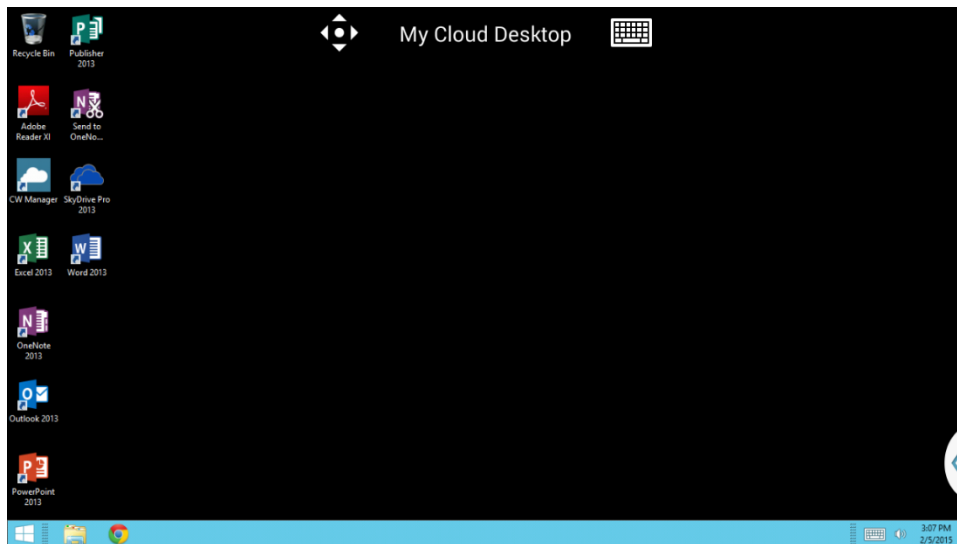

- Tap the **check mark** to continue
- Enter the User name and Password provided by nGenX and tap the **check mark** to continue

- The connection to the nWorkspace is complete - tap the connection to launch the nWorkspace

- The nWorkspace will appear as it does below

The RDP client is now set up correctly. You will not need to do this again – this is a one-time install.
